

The Nimbus Innovation Awards – SuperComputing Edition 2025 Celebrate the Future of HPC and Quantum Technologies at ISC

Wednesday 11 June, 2025

EMBARGOED UNTIL WED JUNE 11th 2025 AT 12PM CEST

Hamburg, Germany — June 11, 2025 — Amid the vibrant energy of **ISC 2025 in Hamburg**, the **Nimbus Innovation Awards – SuperComputing Edition 2025** have officially revealed this year's standout innovators in high-performance and quantum computing.

Organized by the **Nimbus Alliance** — a European partnership of four leading B2B technology publications:

- **PRONETIC** (Spain)
- **XX / Pro** (Germany)
- **Technology Insider Pro** (The Netherlands)
- **EDGE9** (Italy)

Having **124 participating companies** with their cutting-edge contributions, this year's edition has recognized excellence across **13 main categories and 3 special categories**.

The Nimbus Innovation Awards are delivered **directly at the booths of the winners** on the show floor of ISC 2025 in Hamburg, Germany. Each award is presented **in person by the lead editors** of the Nimbus Alliance member publications, making the recognition both intimate and meaningful — an opportunity to celebrate innovation where it's being showcased and demonstrated.

This edition shines a spotlight on the technologies redefining what's possible in **scientific computing, AI acceleration, exascale infrastructure, quantum error correction, data fabrics**, and more. The selection process has been guided by editorial expertise, rigorous evaluation, and deep industry insight.

These awards are not just about impressive specs; they're about vision, execution, and solving real-world computational challenges. From established players to emerging disruptors, the winners represent the frontier of performance computing.

The award event underscores the Nimbus Alliance's ongoing commitment to highlighting the world's most impactful technology developments through editorial excellence.

This is the complete list of winners:

Main Categories

Best Quantum System Model Innovation

Best Quantum Software Innovation

Best Supercomputing CPU Innovation

Media:

Related Sectors:

Business & Finance :: Computing & Telecoms :: Consumer Technology :: Media & Marketing :: Medical & Pharmaceutical :: Public Sector & Legal ::

Related Keywords:

Awards :: Technology :: Supercomputing :: Hpc :: Quantum Computing :: ISC :: Nimbus ::

Scan Me:

Best Super Computing GPU With No Switch

Best Super Computing Server Platform Innovation

Best Super Computing Convergence Innovation

Best Super Computing Storage Hardware Innovation

Best Super Computing Storage Software Innovation

Best Super Computing Cooling Innovation

Best Super Computing Networking Innovation

Best Super Computing Data Platform Innovation

Best Super Computing Revolution

Best Super Computing Future Digital Twin Innovation

Special Categories

Best Super Computing SBC Innovation Overall

Best Super Computing GPU Architecture Innovation Overall

About the Nimbus Alliance

The Nimbus Alliance is a collaborative initiative formed by four of Europe's most respected B2B technology publications: **PRONETIC** (Spain), **XX / Pro** (Germany), **Technology Insider Pro** (Netherlands), and **EDGE9** (Italy). Together, they provide in-depth coverage and expert analysis of enterprise IT, infrastructure, and frontier technologies. The Nimbus Alliance was created to spotlight innovation across borders and give visibility to the companies shaping the future of computing. The Nimbus Innovation Awards are one of its key initiatives, recognizing excellence in areas such as supercomputing, AI, and quantum technologies.

The Nimbus Alliance and the Nimbus Innovation Awards are an **independent initiative not affiliated** with ISC.
