

# This AI Assistant is Making Receptionists Obsolete! How Otouo is Revolutionising Business Operations

Monday 8 July, 2024

In a move set to disrupt the business process automation industry, Otouo has officially launched its innovative AI-powered scheduling and communication platform. The startup, founded by entrepreneur Andre Johnston, aims to streamline front-of-house operations for businesses across various sectors, from restaurants and salons to law firms to large healthcare and enterprise companies, using cutting-edge conversational AI for customer service.

"Otouo isn't just automating tasks; we're liberating human potential. Our AI assistant handles the routine, allowing businesses to focus on growth and innovation." - Andre Johnston, Founder and CEO of Otouo

## Revolutionising Front-of-House Operations with Custom Chatbots and Live Chat AI

Otouo's platform leverages advanced artificial intelligence to automate appointment scheduling, email management, and other repetitive tasks that traditionally consume valuable staff time. By intelligently handling these operations through interpreting emails and customer service messages, Otouo allows businesses to redirect their human resources towards more strategic, growth-oriented activities.

"We're excited to introduce Otouo to the world," said Andre Johnston, founder and CEO of Otouo. "Our platform represents a significant leap forward in how businesses manage their day-to-day operations. By harnessing the power of conversational AI for customer service, we're not just automating tasks; we're fundamentally changing how businesses interact with their customers and manage their time."

The global market for business process automation has seen exponential growth in recent years, with experts projecting it to reach \$19.6 billion by 2026. Otouo is positioning itself at the forefront of this trend, offering a solution that goes beyond simple automation to provide adaptive, learning-based assistance.

## Email Automation: A Game-Changer for SME's and Beyond

One of Otouo's key features is its ability to understand and interpret client communications across various channels, including email, direct messages, and chat platforms. The AI assistant can detect appointment requests, automatically schedule them, and send confirmation emails with embedded links for easy access. This seamless process significantly reduces the workload on front-of-house staff and minimises the potential for human error.

To illustrate the impact of Otouo's email automation capabilities, consider the case of La Trattoria, a popular Italian restaurant in the Midwest. Before implementing Otouo, the restaurant's staff spent an average of 30-40 minutes per day manually booking reservations received via email. This time-consuming process often led to delays, double-bookings, and missed opportunities.

After integrating Otouo's email automation system, La Trattoria saw a dramatic improvement in their reservation process. The AI-powered platform now interprets the intent of incoming emails and automatically books reservations into the restaurant's native calendar. This has not only saved the staff valuable time but also improved accuracy and customer satisfaction.

"What sets Otouo apart is its ability to learn and adapt," Johnston explained. "Our AI doesn't just follow pre-set rules; it understands context, recognises patterns, and continuously improves its performance. This means that as businesses use Otouo, the platform becomes increasingly attuned to their specific needs and operational nuances."

Early adopters of the platform have reported significant time savings and improved customer satisfaction. Sarah Chen, owner of Olier Spa in the UK, shared her experience: "Since implementing Otouo, we've seen a 45% reduction in administrative tasks. Our staff can now focus on providing exceptional service to our clients, rather than getting bogged down in scheduling and email management."

## Exclusive Early Access Program Launched for Businesses of All Sizes

In an exciting development for potential users, Otouo has announced the release of its early version to a

limited number of early adopters. Businesses interested in being among the first to experience the platform's capabilities can sign up at [otouo.com](https://otouo.com). This exclusive opportunity allows forward-thinking companies, from small salons to large enterprise firms, to gain a competitive edge in operational efficiency.

"We believe in the transformative power of our technology," said Johnston. "By offering early access to a select group of businesses, we're not only providing them with a powerful tool but also gathering valuable insights that will help us refine and enhance Otouo for wider release."

The platform offers a tiered subscription model, catering to businesses of various sizes and needs. From local restaurants and beauty salons to law firms and enterprise companies, Otouo's scalable solution promises to deliver value across the board.

Recent data from a pilot program involving 50 businesses across various sectors has shown promising results. On average, businesses using Otouo reported a 40% reduction in time spent on scheduling and email management, a 25% increase in appointment bookings, and a 15% improvement in customer satisfaction scores. These early indicators suggest that Otouo's AI-driven approach could indeed be a game-changer in business process automation.

## **Seamless Email Integration**

Otouo effortlessly integrates with Gmail and Outlook, becoming an invisible assistant. It scans emails, interprets requests, and updates calendars automatically. This seamless connection transforms Otouo into a natural extension of daily business tools, eliminating manual scheduling tasks.

## **Enterprise-Level Solutions for Complex Operations**

While Otouo offers significant benefits for small and medium-sized businesses, its capabilities extend to meet the complex needs of enterprise companies as well. The platform's scalability and customisation options allow it to handle high-volume scheduling, multi-department coordination, and intricate communication workflows often required by larger organisations.

"Our goal is to create an ecosystem where businesses of all sizes can operate with unprecedented efficiency," Johnston shared. "For enterprise clients, this means not just automating individual tasks, but optimising entire operational processes. Otouo can integrate with existing enterprise systems, providing a seamless transition to AI-enhanced operations."

As businesses increasingly look to technology to streamline their operations and gain a competitive edge, solutions like Otouo are likely to play a crucial role. With its innovative approach to AI-powered assistance, including custom chatbots, live chat AI, and email automation, Otouo is well-positioned to lead the charge in this evolving landscape.

The limited early access program is now live, and interested businesses are encouraged to visit [otouo.com](https://otouo.com) to secure their spot. As the business world continues to evolve, platforms like Otouo may well become essential tools for companies looking to thrive in an increasingly competitive and fast-paced environment.

With its promise of enhanced efficiency, improved customer service, and the liberation of human potential through conversational AI and email automation, Otouo is certainly a startup to watch in the coming months and years.
