Timberland Watches Now Available At Watch Supermarket

Friday 17 August, 2012

Online watch suppliers Watch Supermarket have unveiled another new addition to their already growing product range following the arrival of the globally recognised Timberland brand of watches.

Timberland have built and maintained an illustrious reputation for producing high-quality outdoor footwear predominantly for activities such as hiking and mountaineering. In the 1990s they expanded their product line to include watches, all of which display the same rugged, outdoors style that you would come to associate with Timberland products.

Watch Supermarket have made a total of 35 Timberland watch designs available on their website and an eclectic range it is too with a collection comprising of leather straps, colourful silicone straps and outdoor-tested chunky stainless steel cases. Each watch also comes equipped with sapphire-coated mineral crystal dials for that added touch of class.

Conscious of the environment and keen to display their green credentials, Timberland back in 2009 made a commitment that they would refuse to use any leather in their products which contributes to the deforestation of the Amazon Rainforest and global warming.

All Timberland watches on the site only use social responsibly sourced leather, and come packaged in a stylish, yet ecologically-aware cardboard box.

Anyone who purchases a Timberland watch via Watch Supermarket are comprehensively protected by the manufacturer's official 2 year guarantee, so value for money is assured.

Watch Supermarket, who also stock Casio watches and Rotary watches, also offer free delivery; next day if ordered before 4pm.

Further brands are expected to be added to the site over the coming weeks and months.
