

Top Pharma Companies Which Are Raking the Moolah in 2015 and Their Product Pipeline Market Research

Wednesday 15 July, 2015

Bangalore, India - July 15, 2015

The pharmaceutical industry is growing! A report by the World Health organization (WHO) indicates that the global pharmaceuticals market is currently worth US\$300 billion a year. This figure is expected to rise to US\$400 billion within the next three years. It also reports that the 10 largest pharmaceutical companies control over one-third of this market, several with sales of more than US\$10 billion a year and profit margins of about 30%.

Another study indicates that Aging populations, chronic/lifestyle diseases, emerging-market expansion, and treatment and technology advances will drive growth in the pharmaceutical sector in 2015.

Having said this, we decided to put together the top pharmaceutical companies that have created compelling product pipeline reports that will help you understand today's market, strategize better and make the right decisions!

Here are the product pipeline market research reports of some of the [top pharmaceutical companies](#) :

Actavis Plc

This Company specializes in manufacturing and commercializing of branded pharmaceuticals, generic and over-the-counter medicines, and biological products.

Actavis operates the world's third-largest generics business. The company is ranked in the top 3 in 12 global markets, top 5 in 16 global markets, and in the top 10 in 33 global markets. Recently, they acquired Allergan, Inc. (valued at approximately \$70.5 billion). This merger has created one of the world's top 10 pharmaceutical companies by sales revenue, with combined annual pro forma revenues of more than \$23 billion anticipated in 2015.

Celgene

Valued at \$90.4 Billion, this biotechnology company designs and manufactures therapies that treat cancer and immune-inflammatory related diseases. Its major products are Thalomid and Revlimid. Celgene works in collaboration with various pharmaceutical companies for the advancement of research in the field of cancer and inflammatory disorders.

Recently, they inked a collaboration deal with Astrazeneca (for \$450 million) to study their Phase III immuno-oncology drug candidate. They also acquired Quanticel for \$485 mn.

Amgen

This is the world's largest independent biotechnology firm. In past couple of years, Amgen's stock has been tripling in a four-year time span. The stimulus behind this success has been its late-stage pipeline. The company has announced that between 2014 and 2016, they are set to deliver 10 late-stage products; a few of these products have already displayed positive results and are now available on pharmacy shelves.

Amgen recently acquired oncology specialists Onyx and BioVex, elevating its market value, placing it beside market giants like Celgene.
