Tree Service Experts Riverside Helps Homeowner Get Rid of an Invasive Tree

Tuesday 27 September, 2022

Riverside, California – When Frank Dov planted a white oak next to his house, the homeowner reportedly expected the tree not to impact his home in any way. However, years later, the homeowner realized that planting the tree 5 feet from his house was not the best thing—the tree outgrew its allocated space and started invading the special space that was supposed to be solely occupied by his house.

"The tree's trunk expanded and started pushing against the wall," said Frank. "While this was not causing any immediate issues, the branches were already impacting the roof negatively. In addition, the fact that the tree was still in its early years and was already damaging the house meant that the tree would cause damages worth thousands of dollars in the next few years. For this reason, tree removal became the very best option."

The homeowner noted that all he had to do was find a team to ensure his house's safety. The tree was already affecting his house, so the tree removal team needed expertise to bring it down without causing property damage.

"An online search revealed Tree Service Experts Riverside as the best tree care company," said Frank Dov. "The company had extremely positive testimonials, and its website indicated that it had been operating in Riverside for more than 25 years. The family was sure that the company had handled thousands of complicated procedures within this period and gathered the necessary experience."

The homeowner noted that he was impressed by the fact that the company boasted advanced tree maintenance tools. What's more, the fact that the company had an experienced emergency tree removal team was another confidence booster.

Frank reportedly called Tree Service Experts Riverside to request a tree maintenance service at around 9 am. At 9:30 am on the same day, the company had sent a professional to inspect his landscape and provide an estimate.

"The family was first impressed with the company's fast response to the tree service request," said Frank Dov. "The next thing that impressed the family is its affordable price. The family expected the company to charge a much higher cost for a tree standing in such a risky position."

"The family did not even have to bargain—the price was already affordable," said Frank Dov. "The family immediately told the professional to start working on the tree. The professional picked up his phone and called the office to request that the tree removal team initiate the work. The team arrived on the landscape with advanced tools in the hour."

The homeowner enjoyed watching the company working. The tree cutting professionals reportedly climbed the tree and pruned it, using the crane to bring the branches down without causing further damage to the roof. Before cutting the main tree, the team attached it to the crane using ropes—this helped the team force it to fall away from the house.

"The team went ahead and converted the tree into firewood after learning that the family uses it for heating," said Frank Dov. "The team also ground the stump to improve safety on the landscape. Then, before leaving, the team of tree service providers in Riverside collected the waste generated by the procedure, leaving the landscape looking attractive."

Tree Service Experts Riverside base of operation is located at 6892 Doolittle Ave, Riverside, CA 92503, United States. Homeowners interested in the company's services can reach its offices by calling +1 951-389-7990 or emailing sales@thelocaltreeexpert.com.
