

Tripleseat Solves The Large Party Reservation Problem for Restaurants and Their Guests

Thursday 7 March, 2024

Concord, MA (March 7, 2024) -- [Tripleseat](#), the leading innovator in cloud-based sales and event management software for restaurants and hotels, launches a one-of-a-kind reservation solution to help consumers and restaurants reserve tables for large parties.

Built on the [TripleseatDirect](#) platform, the new Large Party Reservations solution caters to large party reservations typically between 6-15 people. Reservations of 6+ people are a challenge for both people looking to book a table and restaurants trying to accommodate them. For restaurants, large parties can be difficult to manage and staff resulting in poor service and lost revenue. For guests, it is a challenge to secure a table with restaurants causing frustration for everyone.

Tripleseat's new Large Party Reservations product solves the headaches of reserving and servicing large reservations by enabling the restaurant to offer online table availability, pre-ordering, and up-front payment. Armed with all the details for the reservation, the kitchen can prepare in advance and the venue can staff appropriately resulting in a positive and profitable reservation for everyone.

"Tripleseat continues to develop solutions to tackle challenges that restaurants face every day and turn them into revenue opportunities," says Jonathan Morse, CEO of Tripleseat. "The Large Party Reservations product solves a big problem for restaurants and addresses the needs of consumers by providing them with an easy and quick reservation capability."
