TWC IT Solutions attains Triple ISO Certification to enhance security standards for UK businesses

Thursday 15 May, 2025

London, United Kingdom - May 2025 - TWC IT Solutions, a leading provider of IT, communications, and cybersecurity solutions in London, announced it has successfully achieved three internationally recognised ISO certifications: ISO 9001:2015 (Quality Management Systems), ISO 27001:2022 (Information Security Management Systems), and ISO 14001:2015 (Environmental Management Systems).

These accreditations underscore TWC IT Solutions' unwavering commitment to excellence, client trust, information security, and environmental responsibility across its global operations.

Following a rigorous external audit process, TWC's management systems have been independently assessed and certified to meet the stringent requirements set by the International Organization for Standardization (ISO). The certifications cover the delivery of infrastructure and support solutions through IT, communications, and development partnerships for global business clients.

> "Achieving these certifications represents a significant milestone for TWC IT Solutions. They demonstrate our ongoing dedication to quality, security, and sustainability - principles that are embedded in everything we do. Our clients rely on us to protect their critical assets, deliver service excellence, and promote responsible business practices, and we are proud to reaffirm that trust through this achievement." said Paolo Sartori, Chief Executive Officer of TWC IT Solutions.

The newly awarded certifications are as follows:

- ISO 9001:2015 - A globally recognised standard for quality management systems, ensuring consistent delivery of services that meet client and regulatory requirements.
- ISO 27001:2022 - The foremost international standard for information security management, safeguarding the confidentiality, integrity, and availability of information assets.
- ISO 14001:2015 - The standard for environmental management systems, demonstrating a commitment to sustainable operations and the reduction of environmental impact.

This recognition builds upon TWC IT Solutions' two-decade heritage of service excellence, strategic innovation, and client-focused delivery. It further strengthens the company's position as a trusted partner to businesses operating in complex and highly regulated industries, including finance, recruitment, healthcare, and professional services.
