UK Backup Announces full support for Windows 8 and Windows Server 2012.

Thursday 25 October, 2012

Southampton (UK) October 29, 2012 - **UK Backup announces the immediate support of Windows server 2012 and Windows 8 with the release of version 14 of its Online Backup software. Version 14 brings a whole host of new features to its clients allowing them to further protect their data.**

UK Backups online backup solution is a complete range of services that offer comprehensive and easily scalable data protection for businesses of every size and need. From large-scale networks of servers to individual desktops UK Backups online backup solution enables users to protect all their critical business data with its range of services.

By supporting Microsoft's new Windows Server 2012 and Windows 8 operating system from day one UK Backup ensures its customers using the latest server technology can also easily protect their vital business data with professional backup methods. Along with improved Windows support version 14 of UK Backups online backup software also brings full support for Hyper-V cluster backups, and full support for Microsoft SQL 2012 ensuring that their clients are able to keep backing up their systems whilst using the latest in technology.

UK Backup's Online backup solution supports all Windows operating systems and as standard includes plugins for Microsoft Exchange and Microsoft SQL Backups. Their online backup solution even offers support for virtual environments using its VMware and Hyper-V plugins. Version 14 also includes the standard professional features such as AES-encryption to ensure full privacy, fast data transfers, flexibility, and white labeling options.

James Chillman, Company Director UK BACKUP - "With the release of version 14 of our online backup software we are able to ensure our backup platform is future proofed and offers our clients the ability to use the latest hardware and software, Not only this but with major improvements to backup software our clients will benefit from faster backups and restores."
