

# UK startup launches RentDocs.co.uk to help landlords adapt to the Renters' Rights Act

Sunday 12 July, 2026

[RentDocs.co.uk](https://rentdocs.co.uk) launches an all-in-one platform designed to help UK landlords manage compliance, tenancy documents and rental administration in one secure place.

London, United Kingdom – 12.07.2026

As the UK's rental sector prepares for significant legislative changes under the Renters' Rights Act, a new British software platform aims to simplify compliance for landlords of every size.

[RentDocs.co.uk](https://rentdocs.co.uk) has officially launched as an all-in-one property management platform built specifically for UK landlords. The software combines document management, legally compliant tenancy agreement generation, compliance tracking, rent reminders and tenant document delivery into a single cloud-based system.

The platform has been developed in response to increasing legal obligations placed on landlords, who are now required to manage growing volumes of compliance documentation while ensuring important statutory information is correctly served to tenants.

Among its features, RentDocs enables landlords to:

- Generate 2026-compliant tenancy agreements.
- Securely store Gas Safety, EPC, EICR and other statutory documents.
- Track certificate expiry dates with automatic reminders.
- Create and deliver complete tenancy packs by email and SMS.
- Maintain a full audit trail proving documents were sent and accessed.
- Monitor portfolio compliance through a live Property Health Score.
- Manage rent reminders and overdue payments from one dashboard.

Unlike traditional document providers, RentDocs has been designed as a complete operating system for landlords rather than simply a tenancy agreement generator.

"Landlords are expected to comply with an increasing number of legal requirements while managing properties, tenants and documentation," said C. Loui Yilmaz, founder of RentDocs.co.uk

"Our aim was to build software that removes complexity. Instead of using multiple apps, spreadsheets and folders, landlords can manage everything from one secure platform."

The platform has been built exclusively around UK legislation and is designed to evolve alongside future regulatory changes, helping landlords remain compliant without constantly researching new rules.

Future development plans include AI-powered landlord assistance, electronic signatures, maintenance management, contractor portals and accounting integrations.

RentDocs is available throughout England, Wales and Scotland, with support for different tenancy agreement types where legislation differs.
