

Vaultoro Launches Revolutionary Savings Plan to Combat Inflation and Build Wealth

Wednesday 3 May, 2023

Vaultoro has announced the launch of an exciting new product that will help users protect their wealth against inflation and build a solid financial future. The Vaultoro Savings app combines the time-tested investment strategy of dollar cost averaging (DCA) with the enduring power of gold, offering a simple and effective way to navigate today's turbulent economic landscape.

With its user-friendly interface, the app is perfect for beginner investors who want to take advantage of alternative assets like gold and cryptocurrencies such as Bitcoin and Ethereum. The app guides users through a series of simple questions to determine their investment knowledge and tailor their experience to their specific needs.

Vaultoro Savings offers multiple plans to suit different risk appetites, with "The Alchemist" being the most popular choice. This plan offers fully insured gold stored in secure Swiss vaults, providing maximum peace of mind for investors. Other plans are also available for those who want to diversify their investments with cryptocurrencies.

Investing in alternative assets like gold and cryptocurrencies is a smart way to hedge against inflation, and with Vaultoro Savings, users can simply transfer funds via bank transfer. Vaultoro then manages the process of investing these funds into the desired assets automatically, including buying, storing, and insuring the precious metals.

According to Vaultoro CEO Philip Scigala, "Being able to onboard customers and sell them precious metals within 3 minutes is really unseen in this industry." Margarita, a 30-year-old business owner from Switzerland, has praised the app's simplicity, saying, "Now I don't have to worry about investing anymore."
