We are not reinventing the wheel, we are transforming it!

Friday 21 April, 2017

For years, the issue of
waste tyres has been swept under the rug in the UK. Vast storage piles ignite and can burn for days; causing harm to the health of people, the environment and the ever-decreasing ozone layer.

Husband and wife team,
Dan and Vicki Templar, have worked together for over a decade finding solutions to environmental threats, and three years ago we formed Mishergas Ltd to focus on the burning issue of tyres. Our company has developed a unique “Mishergas Process” to clean up and convert waste tyres into reusable and valuable commodities.

Everything we have
achieved so far is by people taking the initiative to invest in their planets’ future. We are crowdfunding again to push our first facility to the finish line. We are close to completion but we are once again calling on the support of the people. We are projecting a 500% return on your investment (through EIS government tax relief), and not only that but you will be helping make a positive change to a cleaner, greener future.

to invest or for more information call 01963 202237 or email
info@mishergas.co.uk

**Our
ethos is “waste is only unrealised potential” we take liabilities and transform them into valuable commodities.**
