

We Care Group and Summit Care Group Partners with MOA Benchmarking to Strengthen Quality and Compliance in Social Care

Friday 21 February, 2025

MOA Benchmarking is delighted to welcome We Care Group (WCG) and Summit Care Group (SCG) as its latest clients. As leading care providers, WCG and SCG collectively operate 35 care homes across England, offering high-quality care to 1,674 residents with the dedication of approximately 1,600 staff members.

With the regulatory landscape evolving and the Care Quality Commission (CQC) under increasing pressure to drive sector-wide improvements, WCG and SCG sought a comprehensive quality management solution to ensure they remain at the forefront of excellence in care. After evaluating the market, they identified MOA Benchmarking as the only platform offering a full suite of purpose-built quality and compliance tools designed specifically to meet CQC requirements.

Jo Crossland, Quality Director at We Care Group and Summit Care Group, highlighted the importance of adopting a more data-driven approach to quality assurance:

“At We Care Group and Summit Care Group, we are committed to continuous improvement and ensuring the highest standards of care for our residents. By partnering with MOA Benchmarking, we are equipping our teams with the tools to systematically collect evidence, track key performance indicators, and drive meaningful quality improvements across all our homes.”

The partnership reflects WCG and SCG’s recognition of the critical role that real-time data and structured quality improvement play in responding to regulatory demands and delivering person-centred care. MOA Benchmarking’s platform provides in-depth insights, risk-adjusted outcomes, and the ability to capture resident-level data—offering a robust framework for evidencing quality and compliance.

Grant Lewis, UK Regional Manager for MOA Benchmarking, underscored the significance of this collaboration:

“We are thrilled to support We Care Group and Summit Care Group in their mission to enhance quality, accountability, and compliance. The renewed focus of the CQC on driving sector-wide improvement makes it more important than ever for providers to adopt structured, evidence-based approaches to quality management. WCG and SCG’s proactive stance sets a benchmark for the sector, demonstrating how technology can be leveraged to meet evolving regulatory expectations while delivering outstanding care.”

As regulatory scrutiny intensifies, partnerships like this one are set to play a crucial role in shaping the future of quality assurance in social care. By integrating MOA Benchmarking’s advanced quality management tools, WCG and SCG are reinforcing their commitment to excellence, transparency, and continuous service enhancement.
