What's new at michaeljohn London

Medispa

Reviv Wellness: Reviv is the global market leader brand for elective hydration, beauty and wellness using intravenous technology. The potent vitamin and antioxidant IV drips as well as infusions combat the effects of ageing, dehydration, illness, fatigue, jet lag and other factors. Michaeljohn is delighted to add Reviv's potent IV drips and infusions to our treatment repertoire to address inner beauty and anti-aging concerns.

IV drips are the fastest and most efficient way to deliver wellness molecules through direct penetration to the blood stream. The body is able to easily absorb 100% of the vitamins and antioxidants compared to 55% from oral intake.

Michaeljohn is now offering IV drips and infusions administered by a qualified nurse as an added anti-ageing treatment to any facial or body treatment.

VelaShapelll: Velashape III is widely considered the most effective and results driven body shaping and contouring machine in the medical aesthetics category. Achieving impressive results, with some clients losing up to 5 centimetres off their waist and abdomen area, VelaShape III uses the advanced technology of infrared light, bi-polar radio frequency and vacuum, which ensures precise delivery of energy. In turn this promotes an increase in circulation, lymphatic drainage, cellular metabolism and collagen depositing. VelashapeIII also achieves outstanding results in minimising and eliminating cellulite. This is the perfect treatment to begin to prepare for your summer ready body.

Macom Waist Sculptor: With the corset back in vogue thanks to the likes of celebrity fans Jessica Alba and Kim Kardashian, who credit their hourglass figures to wearing a so called "waist trainer". Initially developed for post-surgery purposes, with daily wear the circumference of the abdomen will start to mimic the shape of the Waist Sculptor and once a desirable girth has been achieved, occasional top-up wear may be required to maintain the results. The Waist Sculptor instantly gives the wearer that sought after hourglass shape by cinching the abdomen and compressing the tummy, making you look slimmer and more contoured whilst holding everything in. This is one of our best sellers in the Belgravia Medispa.

Hair

Hairdreams Stop & Grow: is a new anti-hair loss therapy developed in collaboration with leading scientists, dermatologists and top scholars. The patent-pending formula is based on an innovative 2-phase system.

The first phase contains a concentrate of phyto-hormones and tetra-g-collagen. It inhibits the hormone responsible for hair loss, DHT, and stimulates cell function activity that is responsible for hair growth. It also wakes up dormant hair roots to help produce new and healthy hair. At the same time, the roots of the hair are further strengthened and secured in the scalp.

The second phase or booster phase is mixed just prior to application for maximum effect. It contains activating chemical compounds, which enhances the effects of phase 1 and also triggers additional growth stimulating activity.

However the best part about Stop & Grow is that it really works and we are getting great results for clients in our salons. After just a short period of time severe hair loss is noticeably reduced for the long term and hair volume is visibly increased. Stop & Grow is suitable for both men and women.

Goldfever Hair Extensions: Often referred to as the highest quality hair extensions available, Goldfever are recognised as the most innovative creators of the modern day hair extension. Looking and feeling as genuine as real hair, hair extensions are typically used for creating length. Michaeljohn has taken hair extensions to the next level by using them to create volume and bounce for those with fine or thinning
