Willis Pest Control Sees Record Year-On-Year Growth

Friday 14 April, 2023

2022 was a record-breaking year for Willis Pest Control with the pest control business having earned multiple high-value commercial contracts and scaling to meet increased client demand.

As an industry-leading pest control business based in the West Midlands; Willis Pest Control have established themselves as the prime destination for pest removal services in the area.

Experiencing a 15% year-on-year increase in turnover, 2022 has been a record year for Willis Pest Control and in order to cater to the requirements of their growing customer base, they have recently scaled to meet popular demand:

- Growth in team sizes for both engineers and staff.
- A new office premises.
- Investment in new phone system.

Willis Pest Control anticipate that 2023 will hold further growth for the business and highlight Summer as the prime season within which their wasp removal services and bee removal services frequently get a large number of inquiries.

“We’re proud to see that so many home and business owners across the Midlands are making use of our services” said Gary Willis, Managing Director of Willis Pest Control. “Pests can pose a major threat to the functionality of a property and tend to have negative implications on the health of any occupants. It’s important that any pest-related issues are dealt with promptly and we’re happy to play our part in protecting the local community”.

An emphasis on quality throughout a tailormade pest control process has earned Willis Pest Control plaudits from clients and industry professionals alike. Through their trusted brand they have recently secured a large contract with a major local housing association alongside a record number of commercial contracts in 2022. They are also looking to further grow their commercial services across 2023 and the foreseeable future.

Services Offered by Willis Pest Control

Willis Pest Control are an comprehensive provider of pest control services covering various types of rodents, insects, and other animal breeds that may try to make a domestic or commercial property their home. They provide extermination services for the most commonly occurring pests such as rats, ants, or cockroaches, as well as those that are more seasonal (bees, wasps, and birds).

As well as being 100% guaranteed, the services carried out by Willis Pest Control are undertaken only after a thorough investigative process is carried out to locate the source of the infestation as well as any means through which this may reoccur in the future.
