Wired Broadcast to unveil Mediaport® SONJA™ at Security & Policing 2020; Delivers multiple security enhancements for resilient secure connectivity on the move

Wednesday 26 February, 2020

London, England — On March 3, 2020, Wired Broadcast will unveil SONJA™, the newest addition to its Mediaport®
line of multi-WAN routers, at Security & Policing in Farnborough. Mediaport SONJA is the most potent combination of features available for creating resilient and secure connectivity on the move, making it an indispensable resource for security and law enforcement.

SONJA sets the bar even higher for multi-WAN routers, with enhanced security, throughput of nearly 1 Gbps, the ability to combine up to 8 simultaneous WAN connections (4 x 4.5G, upgradeable to 5G), and multiple form factors. At the same time, SONJA provides all the key Mediaport features on which law enforcement and security clients have come to rely: ultra-portable, easy to deploy, battery self-powered, and rugged.

Made in the United Kingdom using trusted components from Europe and the United States, SONJA includes enhanced security features such as Arm TrustZone Secure Boot, a secure authentication and encryption chip, and special features available only to select clients. “Security is paramount to our customers, so we pay strict attention to our supply chain while continuing to add higher levels of hardware and software protection,” says Johnnie Dymock, CEO of Wired Broadcast.

Proven in the field, Mediaport is a flexible platform that Wired Broadcast adapts to the needs of clients in law enforcement, counter-terror, intelligence gathering, and special forces.

Attendees to Security & Policing 2020 are invited to see Mediaport SONJA at Stand B52.

About Wired Broadcast: Wired Broadcast is an international provider of agile connectivity for mission-critical applications and of broadcast facilities and services. Since 1992, Wired Broadcast has served hundreds of influential clients in broadcasting (BBC), construction (RG Group), banking (Royal Bank of Scotland), live events (Live Nation Entertainment), as well as security, policing, and defence. We bring you multi-WAN technology and network expertise to create resilient and secure connectivity at remote locations and on the move. We manufacture ultra-portable and rugged Mediaport® routers and are distributors of agile connectivity solutions and a select range of companion technologies to create near-instant connectivity wherever you go.
