Within the "Saudi Exports" program – TestCrew participates in GITEX Technology Exhibition 2022 in Dubai

Monday 3 October, 2022

As part of its efforts to support Saudi exporters for the growth of local companies in global markets and to promote their products and services, the Saudi Export Development Authority continues its efforts and activities to raise the proportion of non-oil exports in the Kingdom from 16% to 50% of the value of GDP to achieve the objectives of Saudi Vision 2030.

For the second year consecutively, TestCrew is participating in GITEX 2022 with the support of the Export Authority as a Saudi company specializing in the field of software quality assurance.

GITEX Technology Week 2022

2022 edition of GITEX Technology Week, the largest technology exhibition in the Middle East, North Africa, and South Asia (MENASA) region, will be held at Dubai World Trade Centre, Dubai starting on Monday, 10th
Oct. with more than 4,500 companies participating to showcase their services and products to 100,000 expected visitors from 170 countries around the world.

GITEX Technology Week has enabled companies and entities from various technology sectors to share their modern visions, and explore their innovative ideas in modern technology fields such as e-commerce, artificial intelligence, fifth-generation technology, cloud computing, electronic devices, applications, and systems. The exhibition also includes live experiments of products and solutions offered by companies, as well as technological dialogues and discussions on current trends and promising opportunities in the future.

International digital quality with promising Saudi hands

TestCrew is a Saudi company with a global vision that provides services that specialize in ensuring the quality of programs and applications and ensuring that they work efficiently and safely. The company provides all elements of technical and functional software quality tests related to the user experience that ensure the safety and security of products from vulnerabilities to protect them from the risks of intrusion, in accordance with ISTQB standards and the certification of the model of levels of quality and maturity tests of international software TMMi.

The company includes a wide range of professionals and specialists in several fields serving the field of software quality, most of whom are in the company's headquarters in Riyadh, the presence of TestCrew is not limited to the local level, since the company enjoys a global presence through its branches spread around the world, and through participation in global and regional technological events, the latest of which is GITEX Technology Week Exhibition.

Innovative Quality Solutions

TestCrew is participating in GITEX Week this time with innovative solutions in the field of software testing and quality assurance, where its team of experts has been able to launch over the past few years a range of solutions that help entities obtain secure and stable digital systems.

TestCrew's new suite of solutions includes solutions that specialize in implementing and monitoring performance tests conducted by companies within their digital systems such as CrewLoad, as well as an innovative and unique integrated platform called CrewCentric that specializes in testing automation and management.

One of the most prominent solutions TestCrew has this year is the QA360 Software Quality Services Management Team, which is one of the company's internal programs that benefits a wide range of companies and entities operating in multiple sectors and in a variety of sizes.

Distinguished partnerships and a global presence

TestCrew has many partnerships with global software quality professional companies such as Checkmarx, WorkSoft, Cavisson, Dynatrace, Tenable, Atlassian, Tricents, Neotys and has proven through the projects in which it has participated to be a trustworthy partner in software quality locally,

regionally and globally. The company has provided its services to more than 250 government and private entities in more than 10 countries, most notably the Kingdom of Saudi Arabia, and has offices spread in prominent countries such as the United States, Britain, India and the United Arab Emirates. The company provides its services to various sectors such as the government and banking sector, telecommunications, health, education and other vital sectors.

TestCrew is the first company regionally to have been able to obtain an ISTQB Platinum partnership from the International Board for Software Quality Assurance known as ISTQB. This partnership is a clear recognition that the company is a provider of software quality assurance services and has a professional team that possesses a range of diverse international certifications in software testing disciplines. In addition, TestCrew has obtained ISO 9001 Quality Management certification which enables the company to compete at the highest levels in the business sector, provides the ability to effectively meet customer needs and achieves operations performance with fewer errors and more profits.
