Monday 12 March, 2018

Introducing RoseSlots.com

What better way to celebrate the recent International's Women's Day on the 8th March and Mother's Day than with an exciting announcement about a brand new female focused slots site!

Rose Slots is a brand new online casino due to launch in the Q2 2018 and unlike most online casino and slots sites, Rose Slots will be designed exclusively for women.

There is nothing more English or feminine than a Rose and this will inspire the design of RoseSlots.com with waves of rose red colours combined with clean white space.

Why should women play at Rose Slots?

Rose Slots will be clear, concise and honest with all offers and promotions. Anything you win with your cash stakes can be withdrawn, regardless of whether you have an active bonus with wagering at the time.

Rose Slots have games that women will love including Fluffy Favourites, Starburst and Legends of Cleopatra and every week they will release brand new games to keep things fresh and exciting.

RoseSlots.com are also very rewarding for loyal players, dishing out free spins on favourite games for every deposit over a £20 minimum. On top of this they will also send you great offers via SMS and email so you always have a great reason to play at Rose Slots.

Rose Slots might be a new slots site, but they have big ambitions to make sure woman all over the UK have a online casino and slots site designed specifically for them.

So what top games can you play at Rose Slots?

They have all the big names such as Starburst, Immortal Romance and Fluffy Favourites. Let's take a closer look at some of these games.

Starburst is one of the most famous slot games in the industry. Designed and built by Net Entertainment, this game has captivated players with its simple but extremely exciting gameplay. Starburst revolves around it's special multicoloured wild stars which will expand to fill the full reel and trigger a respin for more winning combinations. This game is beautiful in design and has became one of the top 3 games in terms of unique players across all devices.

Immortal Romance by Microgaming is another fan favourite. This game has been around for a long time so we can safely call it a Classic Game. This game features haunted mansions, beautiful women and blood thirsty vampires with 243 ways to win it is highly volatile and has the potential to pay out massive wins. Not too long ago a player won £20,000 from a 30p spin playing Immortal Romance when the Wild Desire Feature triggered and turned 4 of the reels wild. One of the main attractions for this slot game is the Wild Desire feature, which randomly fills up to 4 reels with wild blood rich symbols, although most of the time this is only 2 or 3 reels and very rarely 4. This feature is randomly triggered in the base game on any spin. The Bonus rounds are also exciting and generous, starting with 10 free spins with a 5x multiplier. As you win more bonus rounds you can level up and access new and different bonus rounds to make your game experience more exciting.
