Yard Force New NX Models – the successor of LUV and X models, unleashed in 2021

Friday 21 May, 2021

The 2021 model of YARD FORCE NX models come with 3 models: NX60i, NX80i and NX100i, all equipped with LCD control panel, iRadar proactive ultrasonic safety radar, Multi-Zone lawn cutting technology and also the improved Wi-Fi connection, has unleashed to the market, first available on Amazon.de.

Yard Force new NX models have covered with Acrylic-styrene-acrylonitrile (ASA) polymers decking which has better long-term sun, rain, chemical and heat resistance, excellent collision performance, specifically suitable for outdoor use.

LCD control panel

The newly developed LCD control panel has now available to high-end NX models: easy to operate, adjust working schedule, or establish Wi-Fi connections… even without the App, the NX model can be also operated and schedule for daily working.

iRadar Proactive Ultrasonic Safety Sensor

All Yard Force Compact and NX models are equipped with the iRadar ultrasonic sensor, the advanced proactive security technology known from the automotive and aerospace industries, which enables the NX model to detect obstacles 20 cm away and perform actions before collision.

Multi-Zone Cutting Technology

All YARD FORCE NX series are now equipped with Multi-Zone Cutting Technology, which enables user to divide the planned mowing area into several zones, to increase the cutting efficiency and make sure certain area will be always “cared” by robotic mower all along the season.

Improved Wi-Fi Connection

By studying the market and feedbacks from customers, YARD FORCE NX models made lots of improvements to ensure customer’s satisfactory: redesigned and upgrade enabled firmware, improved chip and algorithm.

Yard Force NX robotic lawnmowers also equipped with a brushless motor: robust, reliable, maintenance-free and quiet. With Mow-on-Demand technology, the robotic lawnmower can save energy while working and adjust the cutting performance while mowing.
