You can finally use cryptocurrency for your everyday transactions!

Wednesday 26 September, 2018

Paying for your groceries via debit card is no surprise to anyone, but buying it with bitcoin seems like the thing from a futuristic movie. It's hard to understand how digital assets work, and paying in crypto for everyday basis is nearly impossible to imagine. One of the biggest criticisms of cryptocurrencies is that they are still not a usable solution for day-to-day purchases.

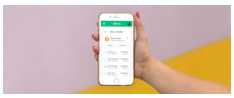

Even after all this time, it not easy to use bitcoin as a payment method for everyday use. Firstly, it is rather expensive to trade in a reasonable amount of funds. Secodly, you have to have at least an intermediate technology knowledge to do so. And that makes it too complicated because you don't want to waste your precious time on minor details while buying your morning latte.

As a result, the market strives for a change and brand new solutions are emerging. Brand new concepts of cryptocurrency marketplaces are being presented to the finance and technology sector. One of them is Tokia exchange platform and debit card that was created with a goal to facilitate and motivate the daily use of digital currency. The main goal of Tokia is to be a convenient and easy way in or the digital currency market. It is a very easy to use for non-experienced user and every procedure comes with detailed step by step guide and explanation.

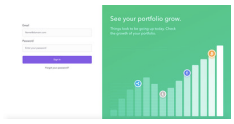

Another major problem with the cryptocurrency market is that the market lacks the ability to purchase small amounts of digital assets and my blouse on eBay is not worth 5 000 pounds. Not to mention, the process of buying bitcoin, ethereum or any other altcoin is long and complicated. It is necessary to simplify and shorten the process for a new and unaccustomed user.

Therefore, a marketplace with extremely low fees and limits was introduced by Tokia, with a goal to make everyday transactions convenient and affordable. That is the reason there are no distractions, unnecessary features and complicated processes in the newest platforms. Also, after a long road, the quick cryptocurrency to fiat, fiat to cryptocurrency operations were introduced. Cryptocurrency has made a long way to the mainstream media and now is making an entrance into our everyday life.
