

You don't need to go to the cinema, because the i-box Impulse brings the cinema to you.

Wednesday 15 June, 2022

The Impulse sound bar by the audio brand i-box is stylish and compact, with a sleek design and excellent audio response. With the latest, state-of-the-art sonic technology, it packs a powerful punch. With a full-on 100W sound experience that will give you crystal highs, rumbling bass, and a mid-range to bring the dialogue to life –movies will move you like never before.

A dark room, some popcorn and an immersive audio-visual experience that transports you to a different world; there's nothing quite like a trip to the cinema. Imagine taking all the best things about going to the movies and leaving out all the worst bits like finding a parking space, queueing up at the snack counter and that incessant sound of crinkling crisp packets. Well, now you can with the i-box Impulse TV Dolby Digital Bluetooth sound bar.

So, what makes the i-box Impulse the best sound bar? Let's start with the six, full spectrum 100W speakers. Our sound bar has two mid-range and four full-range drivers designed to create the ultimate immersive effect by adapting the acoustic output to the dimensions of the room. To truly complete the experience, the legendary Dolby Digital surround sound will draw you right in, making you feel a part of the action.

The Impulse has a wealth of features that will complete your home cinema set up

- Six speakers to give you a crystal-clear sound with a deep bass
- Dolby Digital for a superb surround sound experience
- A stylish fabric finish and modern design that will complement any room decor
- Flexible input audio sources including HDMI (ARC), optical, coaxial, AUX In and USB
- Multiple EQ modes can be set to optimise audio output
- Bluetooth 5.0 so you can wirelessly stream music, podcasts, and audio books from any mobile device
- +/-5 levels bass and treble adjustments

When it comes to connectivity, we understand that not all home cinema set-ups and televisions were created equal. So, we've made sure the Impulse sound bar supports almost any audio source including optical, coaxial, HDMI (ARC), AUX IN and USB MP3 playback.

Of course, you'll want the flexibility to make adjustments to the output, because watching Godfather II will not require the same head-exploding bass as Apocalypse Now. The Impulse sound bar's Multiple EQ modes can be set to optimise your audio allowing you to tweak the bass and treble fine tuning.

And the fun doesn't have to stop just because the film has. The i-box Impulse can still play a starring role in your home entertainment even after the credits have rolled. With Bluetooth 5.0, you can wirelessly stream music, podcasts, and audio books from any enabled mobile device.

They say the devil is in the detail, we know how annoying it is when you buy a new piece of kit and there are basic functionality problems. While you might think it's an obvious choice to include a remote, the fact remains that too many sound bars don't come with a remote control. But ours does and it gives you full control over volume, mode, output, EQ and audio settings.

While the premium fabric finish might seem like the least important feature of the Impulse sound bar, you should never underestimate the value of style. The sleek, luxe design looks as good as the speaker's sound and will look at home in any living room.
